empath_AI

Privacy Policy

2025

At empath_ai, we take your privacy seriously. This Privacy Policy outlines how we handle any data processed through our technical software services. We are committed to ensuring that your data remains secure, private, and compliant with applicable data protection laws.

Data Collection

empath_ai does not collect or process any personal sensitive data. We strictly limit our data handling to non-personal, technical data necessary for the functionality of our services.

No Marketing Usage

We do not use any data for marketing purposes. empath_ai does not engage in advertising, remarketing, or any form of promotional activities using user data.

Third-Party Data Sharing

We do not share, sell, rent, or otherwise disclose any data to third parties. All operations and services are handled internally, and no external parties have access to user data.

Data Storage and Location

All data processed by empath_ai is stored securely within the European Union (EU). We comply with all relevant EU regulations, including the General Data Protection Regulation (GDPR), to ensure the safety and integrity of all data.

Security Measures

We employ industry-standard security measures to protect our systems and any data processed therein. Regular audits, encrypted storage, and strict access controls are part of our commitment to data security.

User Rights

As empath_ai does not collect personal data, there is no personal information for users to request, edit, or delete. Should this change in the future, we will update this policy accordingly and notify all stakeholders.

Policy Updates

We may update this Privacy Policy from time to time to reflect changes in legal, regulatory, or operational requirements. Any such updates will be posted on our website with the effective date clearly noted.
